To Whomever It concerns

11/9/2022

I have had the pleasure of working with Melton Electric on a \$7 million dollar electrical contract for Brunswick County. Leland Burnham was the Project Manager for Melton Electric. I found Leland to be very knowledgeable of the complex electrical system that was required to power up a \$43 million dollar waste water plant. Leland was able to work with the engineer, owner, and myself to resolve problems that existed with bid documents. I look forward to working with Leland again and would recommend him to perform the electrical on any project.

Sincerely,

David Pittman VP/PM
