Melton Electric

Re: Letter of Recommendation

To Whom it May Concern,

On behalf of Balfour Beatty, I am pleased to extend our commendation and strong recommendation for the Melton Electric Team

Melton Electric is currently performing the electrical scope on the McLeod Health Carolina Forest expansion for Balfour Beatty. The project consists of a new five story with approximately 85,000 sq ft of new construction with tie-in and modification to the existing MOB 1 & 2.

The new Hospital and renovations consist of four OR's, MRI, X-ray, CT, mammogram, NUC Med, RAD, pre post rooms, isolation patient rooms and patient rooms.

Even though Melton Electric has not worked for Balfour Beatty prior to the Carolina Forest project, I will say their performance so far has met Balfour Beatty's expectations and has been a great trade partner in helping the project be successful. Melton Electric has been very focused on up front planning including actively participating in BIM coordination, on time submittals and ensuring materials including gear and generators were delivered on site to meet the project schedule requirements. The installation, quality, safety and performance of the work has been very good and has met both the owner and design teams expectations..

I do recommend Melton Electric as an electrical contractor for consideration. And I wouldn't hesitate to invite Melton Electric to any future jobs Balford Beaty does in the Myrtle Beach area.

Sincerely,

David Stanton
VP of Operations
