To Whom It May Concern,

It is my pleasure to recommend Melton Electric without reservation. Three years ago Melton Electric was awarded two new elementary schools for Horry County Schools. The schools were 135,000 square feet each and Melton Electric's combined contract exceeded nine million dollars. The schools were constructed simultaneously. Melton Electric performed as expected on both schools through-out both projects. Both schools were completed as expected and turned over to the school district on time. The electrical scope is a significant part in the success and timely completion of any project. Melton Electric performed each project with quality and was a team player. Thompson Turner will continue to invite them to bid future projects and look forward to a continued partnership.

Sincerely,

Spencer Faw
